Unite with patients across the country to protect your access to essential health care services provided by doctors of chiropractic. Together, we can educate policymakers about the value of chiropractic and influence the outcome of any legislative efforts to reform the national health care system.

Through the Chiropractic Advocacy Network, you can stay informed about these important issues and help ensure that:

- Congress does not restrict your ability to access essential chiropractic services.
- Congress does not limit – but instead expands – coverage for services provided by doctors of chiropractic within Medicare.
- Insurance and managed care companies do not deny patients' access to essential chiropractic services.

### It's easy to help!

There is no cost to sign up, and as a program participant, you'll enjoy benefits such as legislative updates and a monthly e-newsletter containing health information and tips on how best to correspond with your elected officials.
